

Jan Cardia

1. I am a tax accountant. I have been self-employed for over 40 years. Additionally, I have experience in both budgeting and auditing. I am very diligent and detail-oriented, and I will work to get the most out of tax payers hard-earned dollars.
2. I will work toward efficient and cost-effective solutions built around health and safety concerns. I will bring fresh ideas and productive management to advance the great work already being done at the AMCD.
3. My vision is that we will all enjoy the outdoors more because of the reduced mosquito propagation in St Johns County.
4. I went to a community college for business; but my biggest education comes from life experiences, keeping myself informed and from helping those in need.
